Sustainability

planet

profit

Since 'the land dictates the rules', we encourage local project developers to screen their projects for an area with the following characteristics: The land needs to have a minimum perimeter — while size is relative, the smaller the more manageable since it will be easier to monitor threats (e.g., logging, forest fires, etc.) effectively. Also local communities need to be involved in the project development process. This means that positive impact is sustainable — their communities get stable jobs that decrease destruction of their local natural resources. This could be encouraging the use of stoves that consume less charcoal and can be locally produced.

**PRINSIP**

**HARUS DAPAT DILAKUKAN DAN BERMANFAAT UNTUK MASYARAKAT..**

**DASAR**

Therefore, effective protection and sustainable community development depends on developing trust between all rural stakeholders. Trust requires understanding and it may mean that international carbon-credit investors and scientists spend time sipping coffee until late at night with village elders from Malinau in Kalimantan and Ulu Masen in Aceh and learn about each other's families. This means projects need to be designed from the bottom-up. The AD projects in Ulu Masen and Malinau have shown serious intention to do this even though they are large at 750,000 and 325,000 hectares respectively.

## Communities must benefit for forest carbon schemes to be effective

by Rezal Kusumaatmadja on 13 December 2007

**KEPERCAYAAN ADALAH KUNCI..**

## CLIMATE

**+450 LOCAL PEOPLE**

protect the forest from seasonal fires

**AUTOMATED FIRE MONITORING**

updates our fire teams every 8 hours

**18 FIRE POSTS**

enable fast and effective response with specialised equipment to directly target underground peat fires

**AT 26,000 YEARS OLD**

the peat soils under the forest are up to 13 meters deep

**OVER 400 LOCAL PEOPLE**

protect the forest from seasonal fires

**LOCALLY GROWN ORGANIC FOOD**

we aim to make sure all staff meals are sustainably sourced

**REDUCING CONTAMINATION OF RIVER WATER**

26 river latrines are being replaced with land based latrines

**OVER 500 WOMEN AND MEN**

directly employed by the project

## PEOPLE

**67 MAMMAL SPECIES**

**167 BIRD SPECIES**

**45 REPTILE SPECIES**

**111 FISH SPECIES**

**314 PLANT SPECIES**
