

Strengthening the Contribution of Non State Actors -including
Communities- through Improved Access to Finance

Social Forestry Can Help Indonesia Meet Its Climate Pledge

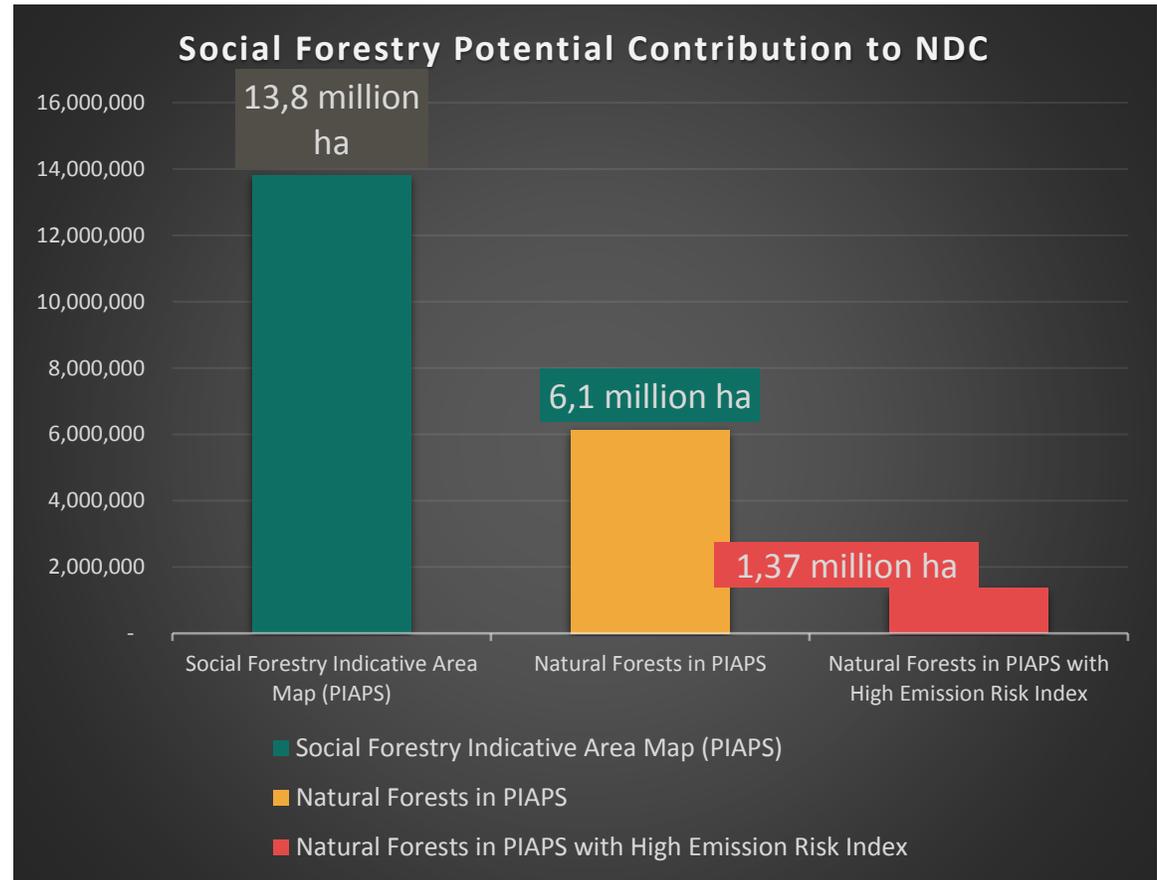

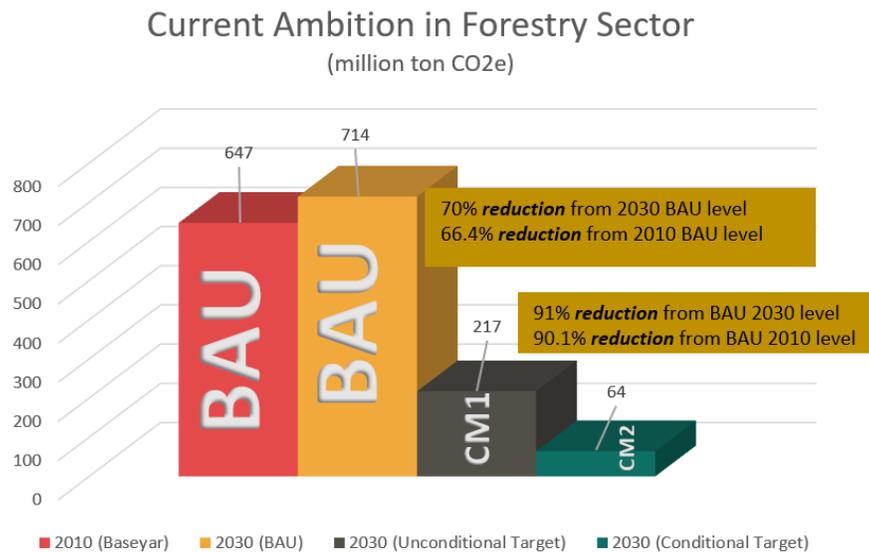

Nadia Hadad

Strategic Development Director
Yayasan Madani Bekelanjutan

The Great Potential of Social Forestry for NDC

Acceleration of social forestry in medium-to-high deforestation risk areas holds the potential to contribute 34.6% to the unconditional NDC target of Indonesia in the forestry sector.

SF can contribute to NDC through:

- reducing deforestation and forest degradation
- enhancing forest carbon stock (rehabilitation, reforestation)
- peatland restoration
- peatland-adaptive agroforestry

Madani and Climate and Society Foundation (2019), "Kontribusi Perhutanan Sosial terhadap Pencapaian NDC"

Case Study: Contribution of 3 Social Forestry Units in KPH Bukit Barisan, West Sumatra

Imagine scaling this up to all 6000 permits that have been granted and PIAPS potential

Illegal logging dropped
83%
(shifted to NTFP,
agroforestry and
ecotourism)

Contribution to NDC
(reduction of
deforestation):
0.025% (235.254
tCO₂/year)

Contribution to NDC
(reduction of
degradation):
0.05% (483.941
tCO₂/year)

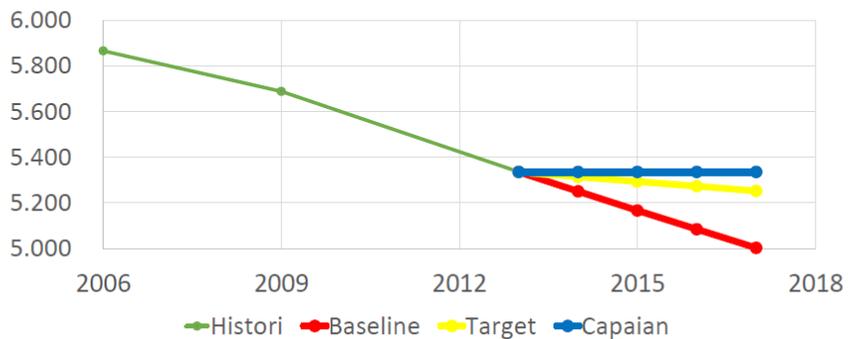

Contribution to NDC
(rehabilitation):
0.024% (226.246
tCO₂/year)

Social Forestry Best Practices and Climate Change

Village Forest of Bujang Raba: Halting Forest Cover Decline

Community Forestry of Kalibiru: Rehabilitation and Restoration

Customary Forest of Marena: Conservation

Hutan Adat Marena, Enrekang, Sulsel

Access to *LH-Fund* is needed to strengthen community's contribution to NDC

Help community reach **consensus** to plan and implement **sustainable land and forest management**

Help community build and market their products and services, including **agroforestry, NTFP, and ecotourism**

Help community assess **climate risks and hazards**, build and execute **climate change adaptation plan** to improve their resilience

Notes:

- *Result-based payment cannot be the only form of funding. Community needs upfront, capacity-building- and empowerment-oriented finance.*
- *Mitigation and adaptation must be implemented simultaneously at the site level*

Synergy with **ProKlim/Climate Village Program**
